KEY FINDINGS

- **Reputation is exceptional.** Perfect 5.0 Google rating across 418 reviews. 81 Yelp reviews with 37 photos.
- **SEO foundation is strong.** 92/100 SEO score. 3 valid rich result schema entities, 0 critical errors.
- **Site speed needs attention.** 42/100 mobile performance. 3.5s LCP, 930ms TBT. Platform overhead is the primary factor.
- **Content gaps exist.** No before/after gallery, no insurance page, no multilingual landing pages.

STRENGTHS

- + 418 Google reviews (5.0 avg) + 81 Yelp reviews prominently linked — strong social proof pipeline
- + All major social profiles connected: Facebook, Instagram, LinkedIn, YouTube, Yelp, Google Maps
- + Thorough JSON-LD schema: org info, doctor credentials, ratings, geo, hours, social links — 0 critical errors
- + Service pages cover key treatments with clear descriptions (Invisalign, braces, early ortho, surgical, TMJ)
- + Transparent pricing and financing info surfaced on-site — reduces friction for high-intent visitors
- + Free consultation offer + Saturday hours clearly displayed — lowers barrier to first appointment
- + Trilingual availability (English, Vietnamese, Spanish) noted on-site — serves diverse OC communities
- + Google Tag Manager, Facebook Pixel, and call tracking all properly installed — analytics-ready

OPPORTUNITIES

1. **Showcase the 5-star story.**
Feature the 5.0/418 review stat in hero, service pages, and schema. Currently underplayed.
2. **Add a before/after gallery.**
The #1 conversion driver for ortho practices. 37 Yelp photos prove results — bring them on-site.
3. **Improve site speed.**
The site runs on Webflow, which is great for design iteration but adds overhead (runtime, bundled scripts, 10 font weights). Image optimization, deferred scripts, and selective font loading could push performance toward 90+.
4. **Help Google understand the site better.**
Add structured data so common questions (FAQs) and treatment details show up directly in search results — more visibility, more clicks.
5. **Add pages people are searching for.**
An insurance info page, Vietnamese + Spanish landing pages, and online scheduling would capture visitors who currently leave empty-handed.
